**DECLARATION OF COVENANTS, CONDITIONS, AND RESTRICTIONS FOR
JUBILEE SUBDIVISION
A NEIGHBORHOOD DEVELOPMENT OF WEST TRACE
DEVELOPMENT**

DESIGN GUIDELINES

These Design Guidelines (“Design Guidelines”) shall apply to all Lots located within the Jubilee Subdivision of West Trace, Development (the “Subdivision”). Capitalized terms, not otherwise defined within this instrument, shall have the meaning ascribed to them in that certain Declaration of Covenants, Conditions and Restrictions for West Trace Development, made by the City of Westlake, a political subdivision of the State of Louisiana, recorded on August 22, 2016, at COB 4137, Page 688, Instrument No. 3242464 in the records of the Clerk of Court for Calcasieu Parish, Louisiana (as amended, the “Declaration”). These Design Guidelines shall be in addition to the restrictions contained in the Declaration and in the event of a conflict between these Design Guidelines and the Declaration, these Design Guidelines shall govern.

Article 1

The following terms used herein shall have the meanings set forth below.

1.1. “**Act**” means the Louisiana Homeowners Association Act, Louisiana Revised Statutes 9:1141.1, *et seq.*, and any successor statutes to the said Louisiana Homeowners Association Act.

1.2. “**Common Area**” means any Common Areas located within the Property (as hereinafter defined).

1.3. “**Design Review Board**” means the Design Review Board created for the Jubilee Subdivision, and is not the Design Review Board, or Declarant, or WREB, or the City of Westlake (as the case may be) under the Declaration.

1.4. “**Lot**” means any Lot located within the Property.

1.5. “**Parish**” means the parish in which the Property is located.

1.6. “**Person**” means any natural person, corporation, limited liability company, partnership, trustee, joint venture, association, joint stock company, trust, unincorporated organization, government or any agency or political subdivision of a government, or any other form of entity.

1.7. “**Property**” and “**JUBILEE SUBDIVISION**” both mean and include the land described in Exhibit A of these Design Guidelines, and includes every Lot and any Common Area thereon and all improvements, servitudes, easements, rights, and appurtenances to the said Common Area, all of which are subject to these Design Guidelines.

Article 2

2.1. CONSTRUCTION OF IMPROVEMENTS. All improvements on a Lot must (1) comply with any applicable governmental ordinances and codes, (2) have a building permit issued by the appropriate governmental entity, if the type of improvement requires a permit, and (3) have the Design Review Board's prior written approval. These three requirements are independent - one does not ensure or eliminate the need for another. The Owner and/or Owner's contractor must comply with all three requirements. Without the Design Review Board's prior written approval for a variance, improvements constructed on every Lot must have the following characteristics:

(1) HOUSES. The principal improvement on a Lot must be one detached single family dwelling. The dwelling size and exterior materials must comply with the applicable ordinances and with any higher standards established by the Design Review Board. Dwelling must have the following setbacks: (1) Twenty foot (20') front setback; (2) Five foot (5') side setback; and (3) Ten foot (10') rear setback.

(2) NEW CONSTRUCTION. The dwelling must be constructed on the Lot. A dwelling or addition constructed elsewhere may not be moved onto a Lot. Factory-built homes are not permitted, even though assembled or finished on the Lot. However, components of dwellings (such as roof trusses) may be manufactured off-site. The construction of a dwelling must be started promptly after the Design Review Board approves the dwelling's plans and specifications. At the start of construction - but not before - building material to be used in the construction may be stored on the Lot. Once started, the dwelling and all improvements on the Lot must be completed with due diligence.

(3) EXTERIOR WALL MATERIALS. The type, quality, and color of exterior wall materials must be approved by the Design Review Board. Generally, the dwelling's total exterior area, minus windows and doors, must be masonry or masonry veneer, such as brick, stone, or stucco or siding which must be a cement fiber board product, such as HardiPlank. Vinyl soffits and fascia are permitted, but Vinyl siding on an exterior wall is not permitted.

(4) ROOFS. Roofs must be covered with material having a manufacturer's warranty of at least 30 years. The use of fiberglass shingles is permitted. The color of roofing material must be weatherwood or an equivalent earth tone color. The Design Review Board may permit or require other weights, materials, and colors.

(5) GARAGE AND DRIVEWAY. Each dwelling must have an attached garage for at least two standard-size cars. If the Lot has alley access, the garage must be a rear or side entry using the alley for access. The driveway must be surfaced with concrete. The garage door may be oriented to face the street on lots that do not have alley access.

(6) CARPORTS. A carport may not be installed, constructed, or maintained on a Lot without the prior written consent of the Design Review Board.

(7) ACCESSORIES. Installation of all exterior items and surfaces, including address numbers, decorative hardware, external ornamentation, lights fixtures, and exterior paint and stain, is subject to the Design Review Board's prior approval, including approval of design, color, materials, and location.

(10) UTILITIES. All utility lines and equipment must be located underground, except for: (1) elevated or surface lines or equipment required by a public utility or the city; (2) elevated or surface lines or equipment installed by Declarant as part of the development plan; and (3) surface equipment necessary to maintain, operate, or read underground facilities, such as meters, risers, service pedestals, and transformers. The Design Review Board may require that utility meters, risers, pedestals, and transformers be visually screened from the street and neighboring Lots. Each Lot will use the city, parish, or private utility company providing sewer and water service to each lot in the community. Individual water supply and sewage disposal systems are not permitted.

2.2. ANNOYANCE. No Lot or Common Area may be used in any way that: (a) may reasonably be considered annoying to neighbors; (b) may be calculated to reduce the desirability of the Property as a residential neighborhood; (c) may endanger the health or safety of residents of other Lots; (d) may result in the cancellation of insurance on the Property; or (e) violates any law. The Board has the sole authority to determine what constitutes an annoyance.

2.3. APPEARANCE. Both the Lot and the dwelling must be maintained in a manner so as not to be unsightly when viewed from the street or neighboring Lots. The Design Review Board is the arbitrator of acceptable appearance standards.

2.4. DRAINAGE. No person may interfere with the established drainage pattern over any part of the Property unless an adequate alternative provision for proper drainage has been approved by the Design Review Board.

2.5. FENCES. All fences must be maintained and kept in good repair so as not to detract from the appearance of the development. Fences must be made of masonry, wood, or other Design Review Board-approved material. Any portion of a fence that faces a street, alley, or Common Area must have a "finished side" appearance. Retaining walls must be constructed entirely with Design Review Board-approved materials, however railroad ties may not be used for a retaining wall visible from a street. The use of barbed wire and chain link fencing is prohibited. The use or application of a stain that cures in a solid color or paint is prohibited. Wood fences must be treated and stained with a Design Review Board-approved color. Without prior approval of the Design Review Board, clear sealants may be applied. Lots within the Subdivision shall adhere to the following guidelines, based upon location of the lot, with the approval of the Design Review Board. Guidelines are as follows:

- a) "Common Area Restricted Fence Lots": Fences on lots which are adjacent to any lakes, ponds, park areas, recreational fields, pathways or Common Area shall be constructed in such a manner as to reasonably preserve the view of such lakes, ponds, park areas, recreational fields, pathways or Common Area to all other Owners, and

as such, these Fences must be a minimum of 50% open (non-privacy) wood picket Fence. The height of Fences along the rear property line of Common Area Restricted Fence Lots shall maintain four (4') feet across the rear side of the property. The height of the side fencing immediately adjacent to the rear property line shall transition to maintain a six (6') feet side fencing height. Transition is not to exceed a six (6') foot distance beginning from the rear property line to the side fencing height of six (6') feet (side Fences may contain privacy fencing). All side fencing is to require three (3) runners for the length of the fence. Fencing shall not be built over or through any servitude or easement on any Lot. This Section is subject to the Design Review Board's right to adopt additional or different specifications for construction or reconstruction of fences. For purposes of illustrations only, examples of fencing that would be considered to be constructed in accordance with this Section 2.5 are depicted on Exhibit B hereto.

- b) "Golf Course Lots": Rear and side yard Fences to be erected on lots adjacent to the Golf Course shall be permitted as approved by the Design Review Board. All rear yard Fences shall be constructed on the rear property line of the Lot. Rear and side yard fences shall be constructed of decorative metal or wrought iron with or without masonry columns as approved by the Design Review Board. Fencing shall not be built over or through any servitude or easement on any Lot. This Section is subject to the Design Review Board's right to adopt additional or different specifications for construction or reconstruction of fences. For purposes of illustrations only, examples of fencing that would be considered to be constructed in accordance with this Section 2.5 are depicted on Exhibit B hereto.
- c) "Privacy Lots": Fences erected on Privacy Lots that are not immediately adjacent to a Common Area nor the Golf Course shall be permitted to construct a six (6') foot rear and side privacy Fence, at the approval of the Design Review Board, that otherwise meets the expectations outlined within these Restrictions. Fencing shall not be built over or through any servitude or easement on any Lot. This Section is subject to the Design Review Board's right to adopt additional or different specifications for construction or reconstruction of fences. For purposes of illustrations only, examples of fencing that would be considered to be constructed in accordance with this Section 2.5 are depicted on Exhibit B hereto.

All Fences constructed within the Jubilee Subdivision of West Trace Development shall not extend beyond the rear property line nor further than the front two outside corners of the residence. Fences must have caps on poles to deter an unsightly appearance. These restrictions are to be followed as listed above, also in accordance with West Trace Development Covenants, Conditions and Restrictions.

2.6. GARAGES. Garage doors must be kept closed, except when vehicles are entering or leaving the garage. No garage built specifically for a recreational vehicle, camper, motor home or similar vehicle will be permitted. Such vehicles may be kept on the Lot by an owner only if such a vehicle remains in the permitted garage. Parking of any vehicle on any Lot other than in the garage, carport or driveway is prohibited.

2.7. MOVABLE STRUCTURES AND OUTBUILDINGS. No structure of any type, dwelling or otherwise, may be moved onto any Lot in the development except as expressly approved by the Design Review Board.

2.8. SCREENING. An Owner may be required to screen anything determined by the Design Review Board to be unsightly or inappropriate for a residential subdivision. Screening may be achieved with fencing or with plant material, such as trees and bushes, or any combination of these. If plant material is used, a reasonable period of time is permitted for the plants to reach maturity as an effective screen. As used in this Section 2.14, “**screened from view**” refers to the view of a person in a passenger vehicle driving on a street or alley, or the view of a person of average height standing in the middle of a yard of an adjoining Lot.

2.9. FURNITURE FOR FRONT PORCH, BALCONY AND YARD. Furniture placed outside of a dwelling on a Lot, whether on the front porch, balcony or in a yard, if visible from a street on the Property or any other location on the Property other than the rear yard of a Lot (i.e., the rear portion of a Lot which faces the rear wall of the dwelling) on which a dwelling is constructed: (a) must be durable, and (b) must not be made of plastic. All collapsible furniture placed outside of a dwelling on a Lot, whether on the front porch, balcony or in a yard, if visible from a street on the Property or any other location on the Property other than the rear yard of a Lot (i.e., the rear portion of a Lot which faces the rear wall of the dwelling) must be placed in storage and outside of the view of Person(s) on any street in the Property.

2.10. CLOTHESLINE VIOLATION. Outside clotheslines or other outside facilities for drying or airing clothes are specifically prohibited and shall not be erected, placed or maintained, nor shall any clothing, rug or other items be hung from any railing, fence, hedge or wall.

2.11. GARDENS. A non-commercial garden for use by a single household may be located on a Lot provided that it is not visible from any street or any neighboring Lot. Garden compost may be kept in quantities required by one household only, provided it is not visible from any street and is kept free from obnoxious odors and insects.

2.12. LEASH VIOLATION. All domestic animals shall be leashed, or detained by fences or invisible fences.

2.13. OFF-ROAD VEHICLE USAGE. Streets shall not be used for any, motorbikes, motorcycles, or motorized recreational vehicles of any type, except for street legal and state-licensed motorcycles for purposes of ingress and egress only. Walking paths shall be used for walking, jogging and bicycling only.

2.14. BULKHEADS, DECKS OR PIERS. No bulkheads or other structures shall be allowed within the Property unless approved by the Design Review Board.

2.15. COMPREHENSIVE PLANS. Nothing contained in these Design Guidelines shall be construed to (i) require an Owner to resubmit Approved Comprehensive Plans to the Design

Review Board for any subsequent approval or re-approval following the initial approval of said Approved Comprehensive Plans, or (ii) prevent an Owner from commencing and/or carrying out any and all work or construction of improvements on any Residential Lot owned by such Owner when such work is commenced or carried out in accordance with an Approved Comprehensive Plan.
